**Dedication**

*"As a Shaolin priest from the Far East, what God do you worship?"  
"Life. I worship life."--Kwai Chang Caine*

Thank you God for creating infinite life  
--all people, places and experiences in endless ways.  
Life's wonderful one-ness overwhelms the mind.  
My words apologize to the wisdom of silence  
while I dance my small finite life

**Picturing Paradise**  
**StarWise AstroCartography Relocation Ratings**

**Greeting**

*"Make everything as simple as possible, but not simpler."--Albert Einstein*

Greetings Once and Future Friend!

Once you move to Paradise, your life will be wonderful almost every day. Astrocartography and other exciting astrology tools now allow you to find your own Paradise. With this book you can discover exactly where on earth is the ideal spot for you to enjoy the best life has to offer—love, wealth, health, family and friends.

The use of location maps to improve people's lives began when Jim Lewis re-discovered why your life is sometimes dramatically different when you move to a new location. His reading of ancient astrology books led to his A\*C\*G map and a thrilling breakthrough for users of astrology worldwide.

I first met Jim in "the Big Apple" in 1976. To say the least, he changed my entire life. His ideas were revolutionary and trend setting. I had just graduated from the Faculty of Astrological Studies (after Koln and Yale Universities), so I thought I knew astrology fairly well.

Yet, hearing Jim explain his insights, however, set me on fire. When we next met in 1977, I had made up my own astrocartography map for his approval--using a slide-ruler!

Unlike his A\*C\*G maps, which just show conjunctions, I drew in all the "major" aspects to my ascendant and MC. Many years of foreign travel told me these other aspects are critical. Jim was impressed, kindly overlooking the "rough" quality of my map itself, and encouraged me to research further.

Ever since, I have done just that. But being a perfectionist, I needed ~30 years of diligent, careful work before announcing my own valuable insights and discoveries. This book offers you the results of my successful research. It gives you, in a simple useful way, the path you can follow to Paradise. It may be just around the corner.

Bon voyage!  
Stephen

## Introduction

*"Not everything that can be counted counts, and not everything that counts can be counted."--Einstein*

### Free Maps and More on Website

I set up my website to support this book and your efforts to find your Paradise. You can obtain free natal and relocated charts, astrocartography maps, various forecasts, interpretations, and more at: [Free Charts/Maps/Forecasts](#)

### Paradise in Your Pocket

This book helps you find Paradise--the place where you can most easily achieve your dreams of a great job, true love, fame, fun, fortune, college acceptance, retirement--you name it. The information here helps you quickly judge the positive and/or negative consequences of being or relocating to anywhere on earth—concisely and accurately.

### Free Introductory Book

If you want to learn more about the whole concept, techniques and benefits of astrocartography relocation, download the free companion book, "[Finding Paradise.](#)"

This introductory book explains how to maximize your life through a (star) wisely planned relocation. You benefit from my own insights, approach and experiences with relocating people. I explain how a professional astrocartographer pinpoints Paradise for you. Plus, I also explain when you should relocate, not just where.

### Paradise Offers Peak Opportunities

Obviously certain places offer you more opportunities and resources to achieve your goals and dreams than other places do.

Relocation astrology pinpoints the ideal places to best realize your goals--you move there, it's Paradise, you win.

### Staying Put

For those who simply can not move, you can still use Local Space Maps to help discover where your best local resources and opportunities are. This is discussed in detail in "[Finding Paradise.](#)"

### Relocated Natal Chart

Obviously, when you move around, your horoscope must also change. Your new chart for any new location is called a Relocated Natal Chart (RNC). In your RNC, your planets may be in new houses while your Ascendant and Midheaven are in new signs. All together these factors signify the external world conditions and circumstances you experience--they "describe" whatever location you are at.

Thus, if you analyze your RNC, you can learn how helpful, in terms of resources and opportunities, any location will be to you, given the goal(s) you have. This means that you can find your ideal location (a.k.a. Paradise) for you to be successful, happy, wealthy and wise.

### Paths to Paradise

This book and "[Finding Paradise](#)" can help you find your Paradise. However, you may prefer to have a professional astrocartographer recommend a location for your current goals and situation. Yet either way, use this book to check things out prior to a test visit.

### "Eany, Meany, Miny, Moe"

Another approach is to see which of your favorite places to live has the highest score given your current goals. Say, for example, that you've always liked the idea of living in Miami, Phoenix, or L.A.-- maybe due to friends, family connections, the weather and the food. So, first, use my website to get your RNC's for those three locations. Then use this book to score each city prior to a test visit to the winner. It may not be Paradise, but it will be the best of your favorite choices.

### Pair of Dice

Sometimes, you have no real choice about where you must move, usually as a result a company job relocation. In this case, this book can at least outline the situational circumstances, challenges and opportunities you will encounter. This is a risky way to relocate, like a game of chance, since your Paradise can be craps or snake eyes. At least, however, you will know how to prepare yourself.

### Rating Paradise

In this book I grade each of your planets in each of the 12 possible new RNC house positions using two scales: A+ (best) to F- and also 14 (best) to 0. The planets and houses are properly color-coded to help you better identify them.

From **Sun in RNC First House (1h)** to **Pluto in RNC Twelfth House (12h)**, you will find all 120 possible planet-house combinations rated both ways. The effects of relocation are further divided into six different areas of life, individually rated to further help you decide where Paradise is for you. These include overall, job, love, family, home, and health. These 720 grades should easily help you pinpoint Paradise.

## 6 Ratings per Planet-House

- 1) Overall Life
- 2) Career and Money
- 3) Social Life, Fun, Love and Romance
- 4) Family Life
- 5) Home and Local Surroundings
- 6) Health

You can find out how your life will be in any location on earth before you ever step foot out your door to journey there.

If you know some astrology, but are not an expert, you will especially like the layout of the book. To make this book easier to read, astrology basics, like the symbols and terms, are explained on my website at [Introduction to Astrology](#).

### The Master's Bible

If you want to know ALL about a potential Paradise spot--without risking any time or money to actually go there--then read all my books at [StarWise Books](#).

## **Chapter 1~A Word of Caution**

*"Figures don't lie, but liars can figure." American Adage*

### **There is No Accounting for Taste**

Rating life is tricky business. The only thing more complicated is life itself. The ratings in this book are no exception. Any rating reflects personal taste and preference. What I might consider "good," someone else could honestly call "average" or "great."

To explain this in terms of this book's rating scale, my "B" rating could be someone else's "C" or "A" rating. For this reason, I deliberately stay middle-of-the-road, so the ratings are more objective and conventional.

### **Shiva's Many Arms**

There is another quite misleading complication to ratings as well. All planets and house positions have more than just one single manifestation. For example, your **Sun** in any house of your relocated natal chart (RNC) actually manifests an infinite number of effects.

Of course, these will reflect traditional solar "themes," such as your conscious ego or will (your adult mind reading this), your children, creativity, sexuality, pleasures, and, for women, the men in your life. The problem is that these different manifestations will have different quality ratings, due to the interactions of natal, transiting and/or progressed planets.

### **No Uniformity**

Sometimes, a planet's effects are very uniform in terms of quality rating. In most cases they aren't. One effect is an "A" while another is a "C," etc.

One overall rating for these separate effects can be misleading unless you read "between the lines." The ratings in this book are an average of the various effects within each category.

Thus, a "B" rating for Career and Money, is an average of all your work and financial circumstances. It does not mean every moment and part of your career and money will be a "B."

Fortunately, in most cases, these variations are minor. To best understand the new opportunities and resources you will enjoy in a specific location, read the full descriptions in the unabridged edition of this book.

### **Number vs. Letter Grades**

If you prefer a numerical score instead of a letter grade, I have included this arbitrary scale: 14 = best, 7 = average, 0 = worst. Numbers allow you to add up your 60 scores (10 planet-house combinations x 6 areas) into one Grand Total.

Then it is easy to compare the Grand Totals for your different potential locations to see which is best.

## Chapter2~Quick Guide to Your Goals

*"Opportunities multiply as they are seized."* Sun Tzu

### The Real Secret of Many A Success--Relocation

You already know that some places offer you more opportunities and resources to achieve your personal goals than other places do. Common sense says, for example, that any big city offers you more job, romantic and other possibilities than some desolate wilderness--unless you want to be a forest ranger.

You may, in fact, know someone who was unhappy, miserable and dead-ended, but decided to move, and wound up in Paradise by pure luck.

### Make Your Own Luck

Fortunately, with this book, you don't need to rely on blind luck, pure chance or accident to find your own Paradise.

Every day there are many true stories in the media of people, who move to a new location where they strike it rich, find the end of their rainbow and enjoy their pot of gold. Of course, these rags-to-riches stories are rarely told in terms of "the benefits of relocation."

Rather, you might hear instead a sports newscast report like this:

### ***True Story of Success--Relocation***

***"Lawrence Peter Berra, a mediocre minor league baseball player was signed last year by the Norfolk Tars and moved to the New City area from his home town of St. Louis.***

***Cardinals general manager, Branch Rickey, was certainly not impressed by Larry's game back in St. Louis, saying, 'he'll never be more than a triple-A ballplayer at best.' Larry was just never able to hit or catch all that great in his hometown.***

***"Yet, here in the "Big Apple," Larry is now hitting a very incredible '.364'! So, next year he'll be moved up to play for the Yankees, who have high hopes for his future."***

**Picturing Paradise**  
**StarWise AstroCartography Relocation Ratings**

**Reborn After A Fresh Start**

Larry "Yogi" Berra is not the only great athlete to benefit enormously from relocation, but he is among the most famous and beloved. If Yogi had not left St. Louis, his life would have stayed mediocre. The New York City area was pure Paradise for him. Great new opportunities and resources were there that allowed Yogi to enjoy fame, fun, fortune, true love, family, health and happiness beyond his wildest dreams.

There are countless millions of other overlooked relocation success stories. As a professional astrocartographer, I realize that this success occurs because the person moves from utter "Nowhere" to Paradise, where ripe opportunities and vast resources await their arrival.

Here is how you can enjoy the same success:

**Do's**

**Like most people, you probably want to attain certain specific goals, such as get a better job, fall in love, retire, improve your health, attend college, or settle down and start a family.**

**The question to ask is, "will relocation help you achieve these goals faster, better and easier, or should you stay put?" The table below, "Your Goal for Relocating," can help you answer that question.**

**The more beneficial planets you can move into helpful houses, the more you will reach your goal and be happy you did. Your best relocation will reposition as many planets as possible into beneficial RNC houses. The planets and RNC houses are prioritized with the most helpful first, least helpful last.**

**The signs and aspects of the planets involved also determine the extent to which you achieve your goals. The signs and aspects of the planets involved also determine the extent to which you achieve your goals.**

**Other key factors to help pinpoint the best location to achieve your goals are:**

- **the signs of the key house cusps involved**
- **the relationships between the planets and their rulers, between the house cusps and the rulers of the house cusps, and between the planets and the rulers of the house cusps.**

**I examine these issues in more detail in my other books.**

## Don't's

The table below, "Your Goal for Relocating," shows only things you should "DO" to increase your positive factors.

However, there are just as many negative things to avoid which can spoil your success. Usually, it is best to carefully minimize the number of "flies in the ointment."

For example, if you want to earn the most money possible, one of the most valuable positive actions you can "DO" is to relocate your Sun into RNC 2h. That will actively contribute to you achieving your financial goal.

Yet, if that is impossible, then at least "DON'T" relocate your Sun into the square and opposite houses, 5h, 8h or 11h, since these houses manifest in ways that often work against the goal of earning a lot of money.

Likewise, Uranus and Saturn are "opposite energy" planets to the Sun. Therefore, "DON'T" relocate them into your RNC 2h, because this will also work against your financial goal.

Converse negations ("double negatives") help you by minimizing problems, but their passive benefits are weaker. Converse negations require the catalyst of positive, active factors ("Do's") to have real beneficial value.

For example, to earn money, relocate your Uranus and/or Saturn into your RNC 5h, 8h, or 11h. This will mildly and indirectly help you earn money, by not preventing you from earning it. These planets do not directly stimulate you to earn lots of money. Rather they help you be inventive and focused in ways that support you earning money--if other positive factors are present, such as, Sun in RNC 2h.
